DURABELLA
SEAMLESS TERRAZZO

AGGREGATES

DURABELLA AGGREGATES

The beauty and richness of traditional Terrazzo, originally invented by the Romans, improved with the latest technologies of today, form a unique flooring system. Durabella has exceptional characteristics in appearance, aesthetics and durability. Durabella is a decorative floor finish, made up with colored binder and mixed in a matrix of marble, glass and other natural materials. After finishing, the natural beauty of the aggregates in a colored setting is exposed to provide a beautiful and durable Terrazzo.

Duracryl International has a strong history of professional, durable and seamless resilient and hard floor coverings for residential, commercial, and industrial use. Starting with floor finishing for projects of the known Dutch architect Gerrit Rietveld in the 1950s to representative floors for multinationals, schools, museums, and offices in our time. The story begins with sand-cement and terrazzo floors traditionally made in the 1930s. The history continues with the production of modern and durable floors of today.
